SAFETY DATA SHEET

In accordance with the requirements of the OSHA Hazard Communication Standard, 29CFR 1910.1200

SAFETY DATA SHEET

MTN PRO ANTI-CORROSIVE PAINT COLORS
Code: EX014PR0991

Version: 1
Date of compilation: 04/10/2018

Date of printing: 04/10/2018

SECTION 1: IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

1.1 PRODUCT IDENTIFIER:
MTN PRO ANTI-CORROSIVE PAINT COLORS
Code: EX014PR0991

1.2 RELEVANT IDENTIFIED USES AND USES ADVISED AGAINST:

Intended uses (main technical functions):
Anticorrosive paint.

Sectors of use:
Professional uses (SU22).
Consumer uses (SU21).

Users advised against:
This product is not recommended for any use or sector of use industrial, professional or consume other than those previously listed as 'Intended or identified uses'.

Restrictions on manufacture, placing on market and use:
Not restricted.

1.3 DETAILS OF THE SUPPLIER OF THE SAFETY DATA SHEET:
MONTANA COLORS, S.L.
Pol. Ind. Plà de les Vives - c/Anàlís Nin 6 - 08295 Sant Vicenç de Castellet (Barcelona) ESPAÑA
Phone: +34 93 833 2760 - Fax: +34 93 833 2761 - www.montanacolors.com
E-mail address of the person responsible for the safety data sheet:
e-mail: msds@montanacolors.com

1.4 EMERGENCY TELEPHONE NUMBER:
+34 93 833 2787 (9:00-17:00 h.) (working hours)
Call CHEMTREC Day or Night. Within USA and Canada: 1-800-424-9300.

SECTION 2: HAZARDS IDENTIFICATION

2.1 CLASSIFICATION OF THE SUBSTANCE OR MIXTURE:

HMIS Hazard Ratings:
(3) Serious chronical health hazard
(4) Very high flammability hazard
(1) Low physicochemical hazard
(G) Safety glasses, gloves and vapor respirator

Note: HMIS Hazard Ratings involve data and interpretations that may vary from company to company. They are intended only for rapid, general identificacion of the magnitude of the specific hazard. To deal adequately with the safe handling of the material, all the information contained in this SDS must be considered.

Hazard classification of the chemical:

Full text of hazard statements mentioned is indicated in section 16.

Note: When in section 3 a range of percentages is used, the health and environmental hazards describe the effects of the highest concentration of each component, but below the maximum value.

2.2 LABEL ELEMENTS:

This product is labelled with the signal word DANGER

Hazard statements:
R222 Extremely flammable aerosol.
H229 Pressurized container: may burst if heated.
H373i May cause damage to organs through prolonged or repeated exposure if inhaled.
H319 Causes serious eye irritation.
H315 Causes skin irritation.
H336 May cause drowsiness or dizziness.
H411 Toxic to aquatic life with long lasting effects.

Precautionary statements:
P101 If medical advice is needed, have product container or label at hand.
P102 Keep out of reach of children.
P103 Read label before use.
P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P211 Do not spray on an open flame or other ignition source.
P221 Do not pierce or burn, even after use.
P271-P260d Use only outdoors or in a well-ventilated area. Do not breathe aerosol.
P410+P412 Protect from sunlight. Do not expose to temperatures exceeding 50°C/122°F.
P273-P391-P501a Avoid release to the environment. Collect spillage. Dispose of contents/container in accordance with local regulations.
SAFETY DATA SHEET

In accordance with the requirements of the OSHA Hazard Communication Standard, 29CFR 1910.1200

Date of compilation: 04/10/2018
Page 2 / 11

SECTION 1: SUPPLEMENTARY STATEMENTS

EUH208 Contains 2-butanone-oxime. May produce an allergic reaction.

MTN PRO ANTI-CORROSIVE PAINT COLORS
Code: EX014PR0991

Supplementary statements:

2.3 OTHER HAZARDS:
Hazards which do not result in classification but which may contribute to the overall hazards of the mixture:
Other physical/chemical hazards: Vapours may form with air a mixture potentially flammable or explosive.
Other adverse human health effects: No other relevant adverse effects are known.
Other negative environmental effects: No other adverse effects are known.

SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

3.1 SUBSTANCES:
Not applicable (mixture).

3.2 MIXTURES:
This product is a mixture.

Chemical description:
Aerosol.

HAZARDOUS INGREDIENTS:
Substances taking part in a percentage higher than the exemption limit:

</table>

Impurities:
Does not contain other components or impurities which will influence the classification of the product.

Stabilizers:
None

Reference to other sections:
For more information on hazardous ingredients, see sections 8, 11, 12 and 16.
SECTION 4: FIRST AID MEASURES

4.1 DESCRIPTION OF FIRST-AID MEASURES:

Symptoms may occur after exposure, so that in case of direct exposure to the product, when in doubt, or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person. Lifeguards should pay attention to self-protection and use the recommended protective equipment if there is a possibility of exposure. Wear protective gloves when administering first aid.

<table>
<thead>
<tr>
<th>Route of exposure</th>
<th>Symptoms and effects, acute and delayed</th>
<th>Description of first-aid measures</th>
</tr>
</thead>
<tbody>
<tr>
<td>Inhalation:</td>
<td>Inhalation of solvent vapours may produce headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, unconsciousness.</td>
<td>Remove the patient out of the contaminated area into the fresh air. If breathing is irregular or stops, administer artificial respiration. If the person is unconscious, place in appropriate recovery position. Keep the patient warm and at rest until medical attention arrives.</td>
</tr>
<tr>
<td>Skin:</td>
<td>Skin contact causes redness. In case of prolonged contact, the skin may become dry.</td>
<td>Remove immediately contaminated clothing. Wash thoroughly the affected area with plenty of cold or lukewarm water and neutral soap, or use a suitable skin cleanser. Do not use solvents or thinners.</td>
</tr>
<tr>
<td>Eyes:</td>
<td>Contact with the eyes produces redness and pain.</td>
<td>Remove contact lenses. Rinse eyes copiously by irrigation with plenty of clean, fresh water for at least 15 minutes, holding the eyelids apart, until the irritation is reduced. Call a physician immediately.</td>
</tr>
<tr>
<td>Ingestion:</td>
<td>If swallowed, may cause irritation of the throat, abdominal pain, drowsiness, nausea, vomiting and diarrhoea.</td>
<td>If swallowed, seek medical advice immediately and show container or label. Do not induce vomiting. Keep the patient at rest.</td>
</tr>
</tbody>
</table>

4.2 MOST IMPORTANT SYMPTOMS AND EFFECTS, BOTH ACUTE AND DELAYED:
The main symptoms and effects are indicated in sections 4.1 and 11.

4.3 INDICATION OF ANY IMMEDIATE MEDICAL ATTENTION AND SPECIAL TREATMENT NEEDED:
Notes to physician: Treatment should be directed at the control of symptoms and the clinical condition of the patient. Antidotes and contraindications: Specific antidote not known.

SECTION 5: FIRE-FIGHTING MEASURES

5.1 EXTINGUISHING MEDIA:
Extinguishing powder or CO2. In the case of more important fires, also alcohol resistant foam and water spray/mist. Do not use for extinguishing: direct water jet. Direct water jet may not be effective to extinguish the fire, since the fire may spread.

5.2 SPECIAL HAZARDS ARISING FROM THE SUBSTANCE OR MIXTURE:
Decomposes when heated intensely. Fire can produce a dense black smoke. As consequence of combustion or thermal decomposition, hazardous products may be produced: carbon monoxide, carbon dioxide, nitrogen oxides. Harmful. Irritant. Exposure to combustion or decomposition products may be a hazard to health.

5.3 ADVICE FOR FIREFIGHTERS:
Special protective equipment: Depending on magnitude of fire, heat-proof protective clothing may be required, appropriate independent breathing apparatus, gloves, protective glasses or face masks and boots. If the fire-proof protective equipment is not available or not used, combat fire from a sheltered position or at a safe distance. The standard EN469 provides a basic level of protection for chemical incidents. Other recommendations: Cool with water the tanks, cisterns or containers close to sources of heat or fire. Bear in mind the direction of the wind. Do not allow fire-fighting residue to enter drains, sewers or water courses.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 PERSONAL PRECAUTIONS, PROTECTIVE EQUIPMENT AND EMERGENCY PROCEDURES:
Eliminate possible sources of ignition and when appropriate, ventilate the area. Do not smoke. Avoid direct contact with this product. Avoid breathing vapours. Keep people without protection in opposition to the wind direction.

6.2 ENVIRONMENTAL PRECAUTIONS:
Avoid contamination of drains, surface or subterranean water and soil. In the case of large scale spills or when the product contaminates lakes, rivers or sewages, inform the appropriate authorities in accordance with local regulations.

6.3 METHODS AND MATERIAL FOR CONTAINMENT AND CLEANING UP:
Contain and mop up spills with non-combustible absorbent materials (earth, sand, vermiculite, diatomaceous earth, etc.). Avoid use of solvents. Keep the remains in a closed container.
7.1 PRECAUTIONS FOR SAFE HANDLING:
Comply with the existing legislation on health and safety at work.

General recommendations:
Avoid any type of leakage or escape.

Recommendations for the prevention of fire and explosion risks:
Pressurized container. Protect from sunlight and do not expose to temperature exceeding 50°C. Do not pierce or burn, even after use. Do not spray on a naked flame or any incandescent material. Do not smoke.

- Flash point: -39°C
- Autoignition temperature: 316°C
- Upper/lower flammability or explosive limits: 2.7% - 20.5% Volume 25°C

Recommendations for the prevention of toxicological risks:
Avoid applying the product directly to people, animals, plants or foodstuffs. Do not eat, drink or smoke in application and drying areas. After handling, wash hands with soap and water. For exposure controls and personal protection measures, see section 8.

Recommendations for the prevention of environmental contamination:
Product dangerous to the environment. Avoid any spillage in the environment. Pay special attention to the cleaning water. In the case of accidental spillage, follow the instructions indicated in section 6.

7.2 CONDITIONS FOR SAFE STORAGE, INCLUDING ANY INCOMPATIBILITIES:
Prevent unauthorized access. Keep out of reach of children. This product should be stored isolated from heat and electrical sources. Do not smoke in storage area. If possible, avoid direct contact with sunlight. Avoid extreme humidity conditions. For more information, see section 10.

Class of store: According to current legislation.
Maximum storage period: 24 months
Temperature interval: min: 5°C, max: 50°C (recommended).

Incompatible materials:
Keep away from oxidizing agents, from strongly alkaline and strongly acid materials.

Type of packaging:
According to current legislation.
**SECTION 8 : EXPOSURE CONTROLS/PERSOINAL PROTECTION**

### CONTROL PARAMETERS:

If a product contains ingredients with exposure limits, may be necessary a personnel monitoring, work place or biological, to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to EN689, EN14042 and EN482 standard concerning methods for assessing the exposure by inhalation to chemical agents, and exposure to chemical and biological agents. Reference should be also made to national guidance documents for methods for the determination of dangerous substances.

</tbody>
</table>

**Remarks:**

- TLV - Threshold Limit Value, TWA - Time Weighted Average, STEL - Short Term Exposure Limit.
- Skin - Danger of cutaneous absorption.
- A3 - Carcinogenic in animals.
- A4 - Non classified as carcinogenic in humans.
- BEI - Biological exposure index (biological monitoring).

**Dermal (Vd):** Means that, in exposures to this substance, the contribution by the cutaneous route, including the mucous membranes and eyes, may result significant for the overall body content if no measures are taken to prevent absorption. There are some chemicals for which dermal absorption, both in liquid and vapour phases, can be very high, and this route of entry may be or equal or greater importance even that inhalation pathway. In these situations, the use of a biological control is essential in order to quantify the overall amount of contaminant absorbed.

**BIOLOGICAL EXPOSURE INDICES (BEI):**

This preparation contains the following substances that have established a biological limit value:

- Xylenes (technical or commercial grade) (2011): Biological determinant: methylhippuric acids in urine, BEI: 1.5 g/g creatinine, Sampling time: end of shift (2).
- Ethylbenzene (2013): Biological determinant: sum of mandelic acid and phenylglycolic acid in urine, BEI: 0.15 g/g creatinine Sampling time: end of shift (2), Notation: (Ne).

(2) When the end of the exposition not coincide with the end of the working day, the sample will be taken as soon as possible after the real exposition ceases.

(Ne) Non-specific. The determinant is non-specific, since it is also observed after exposure to other chemicals.
8.2 EXPOSURE CONTROLS:

**ENGINEERING MEASURES:**

Provide adequate ventilation. Where reasonably practicable, this should be achieved by the use of local exhaust ventilation and good general extraction. If these measures are not sufficient to maintain concentrations of particulates and vapours below the Occupational Exposure Limits, suitable respiratory protection must be worn.

**Protection of respiratory system:** Avoid the inhalation of vapours.

**Protection of eyes and face:** It is recommended to dispose of water taps or sources with clean water close to the working area. Barrier creams may help to protect the exposed areas of the skin. Barrier creams should not be applied once exposure has occurred.

**OCCUPATIONAL EXPOSURE CONTROLS:** Directive 89/686/EEC-96/58/EC:

As a general measure on prevention and safety in the workplace, we recommend the use of a basic personal protection equipment (PPE), with the corresponding EC marking. For more information on personal protective equipment (storage, use, cleaning, maintenance, type and characteristics of the PPE, protection class, marking, category, etc.), you should consult the informative brochures provided by the manufacturers of PPE.

| Mask: | Suitable combined filter mask for gases, vapours and particles (OSHA 29CFR 1910.134 and ANSI Z88.2), Classe 1: low capacity up to 1000 ppm, Classe 2: medium capacity up to 5000 ppm, Classe 3: high capacity up to 10000 ppm. In order to obtain a suitable protection level, the filter class must be selected depending on the type and concentration of the contaminating agents present, in accordance with the specifications supplied by the filter producers. The respiratory equipment with filters does not work satisfactorily when the air contains high concentrations of vapour or oxygen content less than 18% in volume. |
| Goggles: | Safety goggles with suitable lateral protection (OSHA 29CFR 1910.133). Clean daily and disinfect at regular intervals in accordance with the instructions of the manufacturer. |
| Face shield: | No. |
| Gloves: | Gloves resistant against chemicals (OSHA 29CFR 1910.132). There are several factors (for example, temperature), they do in practice the period of use of a protective gloves resistant against chemicals is clearly lower than the established standard OSHA 29CFR 1910.132. Due to the wide variety of circumstances and possibilities, we must have in mind the manual of instructions from manufacturers of gloves. Use the proper technique of removing gloves (without touching glove's outer surface) to avoid contact of the product with the skin. The gloves should be immediately replaced when any sign of degradation is noted. |
| Boots: | No. |
| Apron: | No. |
| Clothing: | Advisable. |

**Thermal hazards:** Not applicable (the product is handled at room temperature).

**ENVIRONMENTAL EXPOSURE CONTROLS:**

Avoid any spillage in the environment. Avoid any release into the atmosphere.

**Spills on the soil:** Prevent contamination of soil.

**Spills in water:** Toxic to aquatic organisms. May cause long-term adverse effects on the aquatic environment. Do not allow to escape into drains, sewers or water courses.

**Emissions to the atmosphere:** Because of volatility, emissions to the atmosphere while handling and use may result. When possible, avoid solvent release to the atmosphere; do not pulverize more than is strictly necessary.

- **VOC:** 647.4 g/l (-H2O-es) ASTM D-3960

*Estimated values based on the substances composing the mixture.

#### 9.2 OTHER INFORMATION:

- **Heat of combustion**: 7132 Kcal/kg
- **Solids**: 23.8% Weight
- **VOC (supply)**: 76.1% Weight

The values indicated do not always coincide with product specifications. The data for the product specifications can be found in the technical data sheet of the same. For additional information concerning physical and chemical properties related to safety and environment, see sections 7 and 12.

### SECTION 10: STABILITY AND REACTIVITY

#### 10.1 REACTIVITY:

- **Corrosivity to metals**: It is not corrosive to metals.
- **Pyrophorical properties**: It is not pyrophoric.

#### 10.2 CHEMICAL STABILITY:

Stable under recommended storage and handling conditions.

#### 10.3 POSSIBILITY OF HAZARDOUS REACTIONS:

Possible dangerous reaction with oxidizing agents, acids, alkalis, amines, peroxides.

#### 10.4 CONDITIONS TO AVOID:

- **Heat**: Keep away from sources of heat.
- **Light**: Avoid direct contact with sunlight.
- **Air**: The product is not affected by exposure to air, but should not be left the containers open.
- **Humidity**: Avoid extreme humidity conditions.
- **Pressure**: Not relevant.
- **Shock**: The product is not sensitive to shocks, but as a recommendation of a general nature should be avoided bumps and rough handling to avoid dents and breakage of packaging, especially when the product is handled in large quantities, and during loading and download operations.

#### 10.5 INCOMPATIBLE MATERIALS:

Keep away from oxidizing agents, from strongly alkaline and strongly acid materials.

#### 10.6 HAZARDOUS DECOMPOSITION PRODUCTS:

As consequence of thermal decomposition, hazardous products may be produced: nitrogen oxides.
SECTION 11: TOXICOLOGICAL INFORMATION

No experimental toxicological data on the preparation is available. The toxicological classification for these mixture has been carried out by using the conventional calculation method of the Regulation (EU) No. 1272/2008~2017/776 (CLP).

</tbody>
</table>

### CMR EFFECTS:
- Carcinogenic effects: Is not considered as a carcinogenic product.
- Genotoxicity: Is not considered as a mutagenic product.
- Toxicity for reproduction: Do not harm fertility. Do not harm the fetus developing.

### DELAYED AND IMMEDIATE EFFECTS AS WELL AS CHRONIC EFFECTS FROM SHORT AND LONG-TERM EXPOSURE:
- Routes of exposure: May be absorbed by inhalation of vapour, through the skin and by ingestion.
- Short-term exposure: Exposure to solvent vapour concentrations in excess of the stated occupational exposure limit, may result in adverse health effects, such as mucous membrane and respiratory system irritation and adverse effects on kidneys, liver and central nervous system. Liquid splashes in the eyes may cause irritation and reversible damage. If swallowed, may cause irritation of the throat; other effects may be the same as described in the exposure to vapours. Harmful by inhalation. Harmful in contact with skin.
- Long-term or repeated exposure: Repeated or prolonged contact may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin. Repeated exposure may cause skin dryness or cracking.

### INTERACTIVE EFFECTS:
Not available.

### INFORMATION ABOUT TOXICOKinetics, METABOLISMA ND DISTRIBUTION:
- Dermal absorption: Este preparado contiene las siguientes sustancias para las cuales la absorción por vía dérmica puede ser muy elevada: 2-methoxy-1-methylethyl acetate.
- Basic toxicoKinetics: Not available.

### ADDITIONAL INFORMATION:
Not available.

### SECTION 12: ECOLOGICAL INFORMATION

No experimental ecotoxicological data on the preparation as such is available. The ecotoxicological classification for these mixture has been carried out by using the conventional calculation method of the Regulation (EU) No. 1272/2008-2017/778 (CLP).

#### 12.1 TOXICITY:

<table>
<thead>
<tr>
<th>Acute toxicity in aquatic environment for individual ingredients:</th>
<th>CL50 (OECD 203)</th>
<th>CE50 (OECD 202)</th>
<th>CE50 (OECD 201)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dimethyl ether</td>
<td>4100 Fishes</td>
<td>4400 Daphnia</td>
<td>&gt; 100 Algae</td>
</tr>
<tr>
<td>Ethyl acetate</td>
<td>212 Fishes</td>
<td>164 Daphnia</td>
<td>&gt; 10 Algae</td>
</tr>
<tr>
<td>Xylene (mixture of isomers)</td>
<td>14 Fishes</td>
<td>16 Daphnia</td>
<td>&gt; 0.26 Algae</td>
</tr>
<tr>
<td>2-methoxy-1-methylethyl acetate</td>
<td>0.27 Fishes</td>
<td>0.14 Daphnia</td>
<td>&gt; 1000 Algae</td>
</tr>
<tr>
<td>Ethylbenzene</td>
<td>134 Fishes</td>
<td>408 Daphnia</td>
<td>&gt; 1000 Algae</td>
</tr>
<tr>
<td>2-butanone-oxime</td>
<td>12 Fishes</td>
<td>1.8 Daphnia</td>
<td>33 Algae</td>
</tr>
<tr>
<td>Hydrocarbons C9 aromatics</td>
<td>84.3 Fishes</td>
<td>750 Daphnia</td>
<td>83 Algae</td>
</tr>
</tbody>
</table>

- No observed effect concentration
- Lowest observed effect concentration

#### 12.2 PERSISTENCE AND DEGRADABILITY:
Not available.

<table>
<thead>
<tr>
<th>Aerobic biodegradation for individual ingredients:</th>

12.6 OTHER ADVERSE EFFECTS:
- Ozone depletion potential: Not available.
- Photochemical ozone creation potential: Not available.
- Earth global warming potential: In case of fire or incineration liberates CO2.
- Endocrine disrupting potential: Not available.

SECTION 13: DISPOSAL CONSIDERATIONS

13.1 WASTE TREATMENT METHODS:
  Take all necessary measures to prevent the production of waste whenever possible. Analyse possible methods for revaluation or recycling. Do not discharge into drains or the environment, dispose of at an authorised waste collection point. Dispose of this material and its container to hazardous or special waste collection point. Waste should be handled and disposed of in accordance with current local and national regulations. For exposure controls and personal protection measures, see section 8.

- Disposal of empty containers:
  Emptied containers and packaging should be disposed of in accordance with currently local and national regulations. The classification of packaging as hazardous waste will depend on the degree of empting of the same, being the holder of the residue responsible for their classification. With contaminated containers and packaging, adopt the same measures as for the product in itself. Ensure the container is completely empty before throwing it away.

- Procedures for neutralising or destroying the product:
  In accordance with local regulations. Do not incinerate closed containers.

SECTION 14: TRANSPORT INFORMATION

14.1 UN NUMBER: 1950

14.2 UN PROPER SHIPPING NAME: AEROSOLS

14.3 TRANSPORT HAZARD CLASS(ES) AND PACKING GROUP:

14.4 Transport by road (ADR 2017) and Transport by rail (RID 2017):
- Class: 2
- Packaging group: -
- Classification code: 5F
- Tunnel restriction code: (D)
- Transport category: 2., max. ADR 1.1, 3.6, 333 L
- Limited quantities: 1 L (see total exemptions ADR 3.4)
- Transport document: Consignment paper
- Instructions in writing: ADR 5.4.3.4

Transport by sea (IMDG 38-16):
- Class: 2 (Division 2.1)
- Packaging group: -
- Emergency Sheet (EmS): F-D,S-U
- First Aid Guide (MFAG): 620*
- Marine pollutant: Yes
- Transport document: Shipping Bill of lading

Transport by air (ICAO/IATA 2017):
- Class: 2 (Division 2.1)
- Packaging group: -

Transport by inland waterways (ADN):
Not available.
Safety Data Sheet

In accordance with the requirements of the OSHA Hazard Communication Standard, 29CFR 1910.1200.

SAFETY DATA SHEET

Properties.

Always the responsibility of the user to take all necessary steps in order to fulfill the demand laid down in the local rules and legislation. The information in this data sheet is based on the present state of knowledge and on current EU and national laws, as the users' working conditions are beyond our knowledge and control. The product is not to be used for other purposes than those specified, without first obtaining written handling instruction. It is always the responsibility of the user to take all necessary steps in order to fulfill the demand laid down in the local rules and legislation. The information in this Material Safety Data Sheet is meant as a description of the safety requirements of the product and it is not to be considered as a guarantee of the product's properties.

SECTION 15: REGULATORY INFORMATION

15.1 USA REGULATIONS:

- Occupational Safety and Health Act (OSHA):
  This product is considered to be hazardous under the OSHA Hazard Communication Standard.
- Clean Air Act:
  - 112(r) Hazardous air pollutants (HAP) (40CFR 68):
    Dimethyl ether: Threshold quantity (TQ): 10,000 lbs.
    The TQ applies to the quantity of substance in an release process, not at the facility as a whole.
  - 307 Hazardous water priority pollutants (HWPP):
    Ethylbenzene
- Comprehensive Environmental Response, Compensation and Liability Act (CERCLA):
  This product contains the following Hazardous Substances for Emergency release notification (40CFR 302):
  Ethyl acetate: Reportable quantity (RQ): 5000 lbs.
  Xylene (mixture of isomers): Reportable quantity (RQ): 100 lbs.
  Ethylbenzene: Reportable quantity (RQ): 1000 lbs.
  Releases of CERCLA hazardous substances, in quantities equal to or greater than their reportable quantity (RQ), are subject to reporting to the National Response Center under CERCLA. Such releases are also subject to state and local reporting under section 304 of Emergency Planning and Community Right-to-Know Act (EPCRA), also known as SARA Title III.
- Superfund Amendments and Reauthorization Act (SARA Title III):
  - 313 Reportable Ingredients (40CFR 372):
    Xylene (mixture of isomers): Yes.
    Ethylbenzene
  - Toxic Substance Control Act (TSCA):
    - Toxic Substance Control Act (TSCA):
      - 315 Reportable Ingredients (40CFR 372):
        Xylene (mixture of isomers): Yes.
      - Toxic Substance Control Act (TSCA):
        - Threshold Quantity (TQ): 100 lbs.
  - California Proposition 65 (Safe Drinking Water and Toxic Enforcement Act of 1986):
    All chemical substances in this product comply with all applicable rules or order under TSCA.

OTHER REGULATIONS:

- Other local legislation:
  The receiver should verify the possible existence of local regulations applicable to the chemical.

SECTION 16: OTHER INFORMATION

TEXT OF THE PHRASES AND NOTES REFERENCED IN SECTIONS 2 AND/OR 3:

Hazard statements according the Regulation (EU) No. 1272/2008-2017/778 (CLP), Anexo III:
- H220 Extremely flammable gas.
- H225 Highly flammable liquid and vapour.
- H226 Flammable liquid and vapour.
- H280 Contains gas under pressure: may explode if heated.
- H304 May be fatal if swallowed and enters airways.
- H312 Harmful in contact with skin.
- H315 Causes skin irritation.
- H317 May cause an allergic skin reaction.
- H332 Harmful if inhaled.
- H335 May cause respiratory irritation.
- H336 May cause drowsiness or dizziness.
- H400 Very toxic to aquatic life.
- H410 Very toxic to aquatic life with long lasting effects.
- H411 Toxic to aquatic life after long lasting exposure.
- H412 Harmful to aquatic life with long lasting effects.
- EUH066 Repeated exposure may cause skin dryness or cracking.

ADVICES ON ANY TRAINING APPROPRIATE FOR WORKERS:

It is recommended for all staff that will handle this product to carry out a basic training in occupational risk and prevention, in order to provide understanding and interpretation of material safety data sheets and labelling of products as well.

MAIN LITERATURE REFERENCES AND SOURCES FOR DATA:

- Threshold Limit Values, (AGCIH, 2016).
- European agreement on the international carriage of dangerous goods by road, (ADR 2017).
- International Maritime Dangerous Goods Code IMDG including Amendment 38-16 (IMO, 2016).

ABBREVIATIONS AND ACRONYMS:
