

Product information | TECHNICAL DATA SHEET

PREFILL GAS

400 ml. Net weight: 133,5g, 4.71 Oz. Net Volume: 275 ml.

GENERAL DESCRIPTION

Pressurized containers ready for filling spray paint cans in a quick, easy, and clean way. Contains propellant only.

CHARACTERISTICS

The general features of the paint will vary depending on the nature of the product it is refilled with. Adjust the viscosity of the product to be filled if necessary.

INSTRUCTIONS FOR USE

- For professional use only.
- Read and follow the Refilling Machine manufacturer instructions carefully regarding the filling process.
- Remove the cap from the product and place the machine cup on the valve.
- Fill the cup with the product up to the 100ml. indicator.
- Insert the product into the refilling machine to proceed with filling.
- Never fill with more than 100 ml of paint.
- Once full, shake the can well before use for approximately one minute after hearing the sound of the mixing ball. Test spray away from the area to be painted until the spray released is uniform.
- Turn the aerosol upside down to purge the valve after use, if the nozzle is clogging replace it for a new one.
- Do not use on electric equipment and use in well-ventilated areas.
- Request the material safety data sheets (MSDS).
- There may be some incompatibility with the paint dispensed into the gas and solvent.
- Once two component paints are refilled into the can's interior, they will have the same pot life as indicated on their manufacturer information.

PHYSICAL CHARACTERISTICS

Valve: Female

LABEL

CAP SYSTEM

Transversal Fat Cap
Transversal ancho
Transversal lines

PACKAGING

Nominal capacity 400 ml.
Heat resistance of packaging: <50°C
Propellant: DME

Box (6 units)
205 X 140 X 200 mm

APPLICATION

The general features of the paint will vary depending on the nature of the product it is refilled with. Using aerosol makes for a versatile and easy application.

APPEARANCE

FILLING MACHINE

Pneumatic filling machine.
For filling up small, individual amounts of spray paint. Easy to adjust pressure gauge. Detachable piston for filling that adjusts to the paint receptacle cylinder.

32 x 35 x 78 cm.

MZ0000045

Measurements:
690 mm. (Height)

Accessories:
Machine cup and Teflon.
