

Product information | TECHNICAL DATA SHEET

SPORTS MARKING

75 ml, 32.13 Oz, 60,3 g.

GENERAL DESCRIPTION

White foam with a high water content and a mixture of additives, designed for temporary marking on sports courts of any type, be they grass, cement or other materials.

FEATURES

- White foam for temporary marking.
- The lifespan of the foam will depend on the environmental conditions such as temperature and humidity, as well as the type of surface that it is applied to.
Data:
 - Room temperature over 30 °C: fading time is less than 1 '
 - Room temperature of 20 °C: fading time between 2' 30 " and 3 '
- The theoretical coverage of the 75 ml container is 5 linear meters (does not include loss due to variation in thickness or other factors that may affect the application of the product).

INSTRUCTIONS FOR USE

- Shake the container for 10 seconds prior to each application.
- Tilt the container pointing to the ground and apply the product at a distance of approximately 20 cm from the surface.
- Do not apply on equipment that is plugged in and use in well-ventilated areas, as the product contains a flammable propellant
- Request safety data sheets.

PHYSICAL PROPERTIES

Nominal capacity:	75 ml
Theoretical yield:	5 m linear
Heat resistance of packaging:	<50°C
Propellant:	GLP
Composition:	Watery
Valve:	Male
	050820

COLOR

Blanco / White
EX19P11124

There is the possibility of manufacturing in fluor red color thought for snowy or white fields.

APPLICATIONS

Non-toxic foam marker, designed for temporary marking. Its main utility is the signaling of free kick points or foul boundaries in team sport competitions, although thanks to its characteristics it may be useful for other applications.

There is the possibility of manufacturing it in fluorescent red, for marking white terrain.
